Product Name: #STR6805 Modified Winch

Product Description: A Modified Winch enables the tightening of stringline during layout process. This single speed winch has a 3.1:1 gear ratio. After stakes are positioned, install winch about 25ft behind the first stake, offset 12-18in outside the line of stringline, with the crank handle to the outside. After held in place by staking to subsurface using 3/4" x 48" stakes, use reel to tighten stringline until taut.

Composition and Materials: Winch is mounted on metal base with holes for staking and securing into sub surface. It is capable of horizontal or vertical mounting. Plated for weather resistance, the winch has a 600 lbs. load capacity.
